***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-26, drawn to a printhead comprising a drop forming mechanism and fluid drop steering service, classified in class 347, subclass 9.
- II. Claim 27-41, drawn to a method of ejecting a fluid drop comprising providing fluid having a drop formation energy threshold, classified in class 347, subclass 56.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are directed to related in that they both involve fluid ejectors. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, the drop steering device and fluid having a drop formation energy threshold are distinct entities.
